SUMMARY

Aspiring Software Engineer with a strong interest in building software applications and working with modern development technologies. Passionate about developing efficient, scalable, and practical solutions through coding and real-world projects. Experienced in working on academic and personal projects that strengthen problem-solving ability and understanding of application development. Continuously learning and improving technical skills with a focus on software engineering and cloud-based systems.

TECHNICAL SKILLS

Programming Languages: C, C++, Python

Web Technologies: HTML, CSS, JavaScript, React.js

Databases: MySQL, Microsoft SQL Server (MSSQL), SQLite

Computer Science Fundamentals: Data Structures & Algorithms, OOPS, DBMS, Computer Networks

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, IAM, VPC, CloudFormation), Docker, GitHub, Jenkins, Ansible

Operating Systems: Linux, Windows Server, kali linux

Tools & Technologies: Visual Studio Code, Git, Cursor, Windsurf, Claude, OpenAI Codex, Git Bash, Cisco Packet Tracer, AI Tools (Llama 3, Groq API, Prompt Engineering)

EDUCATION

Nettur Technical Training Foundation (NTTF), Bengaluru, India
Diploma in Computer Engineering and IT Infrastructure

COMPLETED - JUN 2026

Anikethan Public School, Bengaluru, India
10th Grade, CBSE Board

COMPLETED - MAY 2023

PROJECT

RoutheonSkups AI Travel Planner - <https://routheonskups-dwu4.onrender.com/>

JAN 2026 - JUN 2026

- Built an AI-powered travel planner that generates personalized multi-day itineraries based on user budget, interests, and preferences.
- Integrated Llama 3 (Groq API) to create intelligent travel plans with contextual recommendations.
- Developed map-based UI with Leaflet.js for route visualization, cost estimation, trip saving, and AI travel assistance.

StudyPlan AI Productivity Platform - <https://studivance-z5im.onrender.com/>

NOV 2025 - DEC 2025

- Built an AI-powered student planner to manage subjects, tasks, exams, notes, and schedules in a unified dashboard.
- Added AI features for note refinement, simplified explanations, and academic content assistance.
- Implemented task tracking, exam planning, and a doubt discussion system with resource storage.

SQLMind AI - <https://sql-mind-ai.vercel.app/>

JUN 2026 - JUL 2026

- Developed an AI-powered platform that converts natural language into accurate and optimized SQL queries.
- Implemented SQL explanation, query optimization, complexity analysis, and multi-database dialect support.
- Built an interactive SQL editor with AI chat, query history, favorites, and a curated SQL examples library.
